

Semi-Submersible GRE Applications

NOV Fiber Glass Systems products meet the demanding requirements and regulations associated with the offshore market with our Bondstrand™ fiberglass piping systems. Exposure to the corrosive sea environment and various grades of water conveyed inside the pipe without corrosion makes NOV Fiber Glass Systems the product supplier of choice for a full range of systems from fire protection to deck drains.

NOV Fiber Glass Systems partners closely with project engineers, owners and yards to offer the products and services needed for success. Product variations are available when specific demands require properties such as vacuum or external pressure resistance, electrical conductivity or fire endurance, even to the level of resisting exposure to jet fire. IMO and specific 3rd party approvals guarantee that system performance is never compromised. The ability to meet these high standards is backed by ongoing in-house testing. Commitment to engineering and design capabilities ensures compliance and performance of Bondstrand™ 2000M, 7000M and 2400 series piping, making these systems the products of choice.

Retro-fit

Bondstrand marine products are light-weight, last the life of the facility and require no “hot work” to assemble, allowing replacement (retro-fit) of corroded steel pipe without disruption to the operation.

Global Service Network

The Global Service Network provides owners and operators of Marine and Offshore ships or facilities with fast-response, comprehensive, professional repair and replacement services anytime, anywhere.

Applications

Pontoon	Pump Room	Upper Deck	Living Quarters	Column	Drill Floor
Balance Water	Bilge Water	Brine Water	Grey Water	Sea Water Cooling	Drill Floor Drain
Bilge Water	Sea Water Cooling	Fresh Water Cooling	Potable Water	Fresh Water Cooling	
Drill Water	Fresh Water Cooling	Potable Water	Tank Water	Drill Water	
Potable Water	Drill Water	Sea Water Cooling	Hot Potable Water	Potable Water	
Tank Vent	Potable Water	Tank Vent		Tank Vent	
Brine Water	Ballast Water	Drill Water			
	Tank Vent	Grey Water			
		Black Water			
		Fire Protection			
		Drain Lines
