

PHENOLIC FRP LADDERS

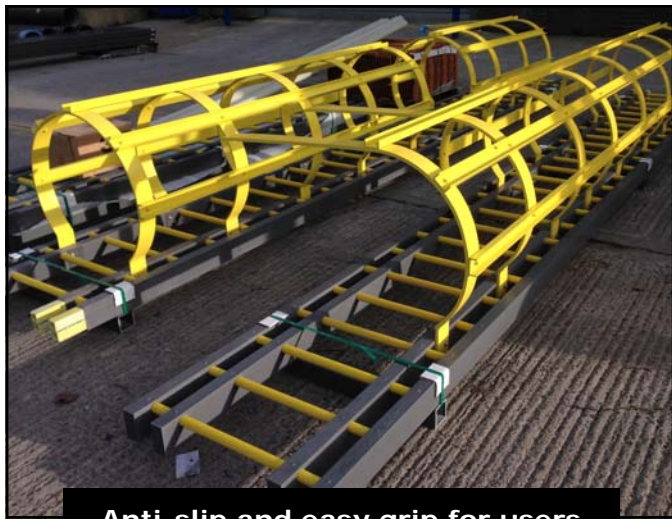

Advanced structural FRP phenolic products for complete structures with superior fire integrity

Pipex px® phenolic FRP Ladders are engineered from corrosion resistant advanced composites using phenolic resin, to attain the ultimate strength and fire resistance to withstand the harsh Offshore environment. Phenolic FRP comprises of superior strength, durability and longevity, as well as providing significant weight savings (typically 1/3rd of steel) compared to traditional materials.

Optional safety cage available

Anti-slip and easy grip for users

Prefabricated for easy installation

WHY choose our product?

Fire retardant,
low smoke/fume

Significant weight
saving, approx.
1/3 v steel

Non-conductive

Virtually
maintenance
free

Superior fire
integrity

Highly
corrosion
resistant

Bespoke design
configurations to
match your needs

25 yrs product
guarantee
available
